

Dental Mammoth's databases now available via KEYPS's educational platform

KEYPS now provides Dental Mammoth's exclusive dental knowledge databases as an integrated part of its education platform. Dental Mammoth's research-based content meets European standards, and via KEYPS's platform, it's accessible to all stakeholders in Turkish dental education.

In dentistry, as in any other field of medicine, there is a need for a trusted information source that enhances clinical decision-making and helps professionals educate themselves with up-to-date knowledge.

Dental Mammoth's solution is globally unique as it provides practical answers to recognisable problems in dentistry. It gives access to over 25 000 expert-written topics and best clinical practices in dentistry, general medicine, and drug databases. In addition to this, globally selected videos, news and scientific resources add value to every clinician's work.

"We welcome our Turkish dental colleagues to experience the value of up-to-date clinical knowledge in their daily studies and clinical work. Via KEYPS's solution, our content will benefit every professor, student and clinician in the value chain. This cooperation truly inspires us", says Dr. Heikki Autti, CEO, Dental Mammoth.

"KEYPS enthusiastically presents all the contributions that will increase the quality of education at the national and international level by offering products that will benefit them in all the training programs it works with. Since it is the most common platform used in health professions education at the national level, it has made it a duty to offer easily accessible and high-quality products to its customers. The database-specific dentistry education provided by DM is an essential product that will meet the needs of the programs that offer education in dentistry in our country. In this context, KEYPS-DM cooperation will make an important contribution to the dentistry undergraduate education given in our country"[e], says Dr. Serdar Gürel, CEO, KEYPS.

KEYPS in brief:

KEYPS is a limited liability company established in 2011. It has its head office in Hacettepe University Technopark (HUB) in Ankara, the capital of Turkey. Through its employees, it provides Education / Curriculum Management Software and Accreditation Consultancy Services to many educational institutions at home and abroad. Education / Curriculum Management Software is the most common software used in programs that provide undergraduate education related to health professions at national level.
