Press Release

New Delhi, India & Helsinki, Finland, Europe

January 25, 2023

For immediate release

Dental Mammoth now available in India

DaiKnow and Dental Mammoth announce their partnership - the innovative Finnish dental knowledge services of Dental Mammoth now available in India.

Dental Mammoth originating in Finland, and DaiKnow, India are thrilled to announce their collaboration to bring innovative Finnish dental knowledge services and products to India.

This new partnership brings together the expertise and resources of both companies, enabling them to offer real-time access to exclusive and research-based clinical decision support with over 25,000 topics, drug databases and clinical decision support tools for dentists and dental students.

Cloud-based clinical databases

"We are excited to partner with Dental Mammoth and bring their cloud-based clinical databases, created in 1995 and regularly updated by over 400 international contributors. This proprietary knowledge provides dental, medical and drug information and real-time access to a repository of searchable articles, news and videos. The knowledge will add value to the existing curriculum for graduating students in Dental Colleges and enable better patient outcomes for practising dentists due to the ease of its integration with existing Patient Management Software," **said Vinay Singh, Managing Director, DaiKnow.**

Clinical Decision Support solution for dentists

"This new partnership with DaiKnow is truly inspirational! We are thrilled to work with DaiKnow and extend our reach by leveraging their existing customer base and domain expertise in India. We offer an Education Support tool for Dental Colleges and a unique Clinical Decision Support solution for dentists based on symptoms differential diagnostic, therapy guidelines, and interactive drug databases. We welcome our Indian dental colleagues to experience the value and benefits of up-to-date clinical knowledge in their daily studies and clinical work," **said Dr. Heikki Autti, CEO, Dental Mammoth.**
